

**From: Prof. Oscar L. Malta** (Departamento de Química Fundamental-CCEN-Universidade Federal de Pernambuco, Recife-PE, Brazil)

**TESTIMONIAL ON THE INTERNATIONAL KRUTYN SUMMER SCHOOL**

**MAZUR-SYRENKA Complex Conference, Krutyn, Masurian Lake District, Poland.**

The International Krutyn Summer School, organized by Prof. Marek Pietraszkiewicz, is a very traditional academic event that has been shown to be of paramount importance for graduate students from all over the world. Besides the high level lectures delivered by renowned scientists, IKSS promotes the rare opportunity to allow extremely fruitful scientific discussions among the participants, in a very friendly and pleasant ambient in Mazur-Syrenka. It is certainly a distinguished academic event of this nature in the world, and along the history of IKSS Prof. Marek Pietraszkiewicz has given an example of excellence on organizational and operational issues. Last year I had the honor to help him in the scientific organizational procedures

I have myself participated twice and became a fan, and undoubtedly intend to participate in the future IKSS events. I not only congratulate the organizing team but also strongly support and encourage the continuity of IKSS.
